criticism, he professed profound devotion to the United States. "I have a big state in it," he said. "My treasure is in Amer-ica." what his critics perceived as the true nature of Soviet and Chinese intentions toward the United States, He was often called the Soviet Union's favorite capitalicalled the Soviet Union's favorite capitalicalled ist and described as a subversive and soft on Communism. Responding to such calmly received than they were uttered. He was criticized as naive, or worse, for Eaton's views were often less

Just how large that treasure might be was a matter of speculation. His eldest son and namesake put it at \$100 million a few years ago, but others suggested that his fortune was much more substantial and that the business wealth he controlled could be measured in the billions.
M. Eaton maintained that peace and

thing you can say about capitalists is that they want to make a profit," he commented, adding: "There is not much to gain if the United States spends billions a year on armaments that ultimately will only blow us all up. Mass destruction is in discordance with the ethical sense of the world, and to incite and promote the decoexistence were matters of logic, to which thoughtful men should yield. "One struction of all our skyscrapers and mag-

'One of the Answers'

Discussing his attitude toward Communism, which he thought was here to stay, he said on his 81st birthday in 1974: 'I am utterly frank when in Russia about the capitalist system. I try hard to conwant to get along."

"I think trade is one of the answers," he went on. "If this country would lower

certain trade barriers, it would have a tremendous effect on the rest of the

by men from the Western and Communist blocs, derived its name from its site — Mr. Eaton's home town, a Nova Scotia States and the Soviet Union. One of the fruits of his concern was the first Pugwash Conference of Nuclear Scientists in pel suspicions among peoples and to re-duce cold-war suspicions was intensified in the mid-1950's by a rapidly grawing nu-clear arms race between the United obster hamlet. 1957. The gathering, which was attended The personal effort by Mr. Eaton to dis-

his support of them and for his activity in behalf of understanding between peoples living under differing systems Mr. Eaton received the Lenia Peace Prize in 1960. It was one of several awards bestowed on him by institutions in Communist counchiefly of scientists and scholars, in coun-tries around the world. The groundwork for the two sets of American-Soviet talks on the limitation of strategic arms has been credited to the Pugwash series. For There has been a series of conferences

leaders as a sign that his hosts were using him as a shield of respectability. Some of the critics were disturbed because the in-Critics of Mr. Eaton viewed the cordial reception accorded to him by Communist

dustrialist, while accusing American leaders of being "political and economic ostriches". In foreign policy, found less fault with Soviet attitudes.

His Judgment Was Questioned

Kadar, the Hungarian strongman, shortly after the Russians had quelled the Hungarian uprising in 1956. The other was a cordial meeting with Nikita S. Khrushchev after the Soviet Prime Khrushchev dent Dwight D. Eisenhower in 1960 reception he gave in New York for Janos Kadar, the Hungarian strongman, Two episodes were often cited in questioning Mr. Eaton's judgment. One was a Minister canceled a meeting with Presi

I asked my Republican friends who among the Democrats was the soundest or any Republican couldn't be elected, so of Franklin D. Roosevelt's Presidential campaign of 1932. "I realized that Hoover man who would save the capitalist orthodoxy - he was an unwavering Retem, and the answer was Roosevelt," Mr. Eaton recalled in the interview. publican until 1930 — came in his support Mr. Eaton's first break with political He remained a nominal Democrat for sys-

the rest of his life, backing Harry S. Truman in 1948 and lending one of his committees a crucial \$15,000 in the closing days of the campaign.

in business, Mr. Eaton's credentials were impecable free enterprise. Many of his dealings had a buccaner aspect, and some financial experts thought him wily as well as astute. In any event he built a ramified industrial empire with combined assets of more than 20 billion that included two railroads—the Chesatian Ch Steel among them, and utilities, coal, iron six major steel corporations, peake & Ohio and the Baltimore & Ohio; six major steel corporations, Republic

Eaton accepted trade unionism in the 1930's; rather than battling the unions, he recognized them and signed contracts with them. He liked to tell about the head of one of the steel companies who staked his job — unsuccessfully — on the belief that his workers would not vote for a

Mr. Eaton's principal office was on the 36th floor of the Terminal Tower in Cleveland. Since 1912 he lived in subdued opulario.

He took farming seriously, specializing in Scotch shorthorn cattle. According to his son, Cyrus Jr., he arose before 6 A.M. daily and always checked the barns before setting off for Cleveland, 20 miles away, and a day of moneymaking. ing pasture and woods near Northfield. lence at Acadia Farms, 850 acres of roll-

ble circumstances in Pugwash, then a village of 500 people, on Dec. 27, 183. Intending to enter the Baptist ministry, he studied at Amherst Academy and Woodstock College. The summer he was 17 he visited his uncle, the Rev. Charles A. Eaton, a Baptist divine in Cleveland. The his uncle's congregation, Mr. and Mrs.
John D. Rockefeller Sr. boy was working in a hotel when, by chance, he was introduced to members of Cyrus Stephen Eaton was born in hum-

Something Better for Him to Do

When Mrs. Rockefeller learned about Cyrus's hotel job, she asked her husband, "Can't you find something better for this young man to do, John?" Mr. Rockefeller said that he guessed he could and put him to work on his Cleveland estate. Young Eaton spent the rest of the summer as a in touch with his ventures and as a fourth messenger in the private telegraph room that Mr. Rockefeller maintained to keep

Mr. Eaton with Nikita S. Khrushchev during a trip to Moscow in 1958

In the fall, when Cyrus prepared to leave for McMaster University in Toronto for ministerial studies, Mr. Rockefeller sought to dissuade him. "You've business you have a great opportunity to benefit mankind." got what it takes to be successful in business," he told the young man. "And in

Disregarding the advice at the time, young Eaton worked his way through McMaster by clerking in a store, collecting delinquent bills for a, physician and working for Mr. Rockefeller's Cleveland gas company during the summers. Upon graduation he was a cowboy for a while in western Canada and then returned to Cleveland as a lay Baptist preacher. Mr. Rockefeller kept after him, and he soon oined the oil magnate's entourage.

franchises for a series of proposed power plants. When he returned successful, the Panic of 1907 was on and the Rockefeller group was unwilling to carry through the venture. Mr. Eaton took the canceled was far simpler than he had imagined built a plant at Brandon, Manitoba. Mr. Eaton got his business start in 1907 when Mr. Rockefeller and a group of friends sent him to Manitoba to acquire franchises, raised capital in

"All I did," he recalled, "was to go to a bank in Canada and show them the franchise. I was honest and earnest and I had a sound business proposition."

Consolidation and Amalgamation

The first plant was a success, so he built others. By consolidation and amalgamation he eventually set up the Continental Gas and Electric Company, with holdings also in the Midwestern United States.

cerns. He was always willing to take a sound risk. Soon worth \$2 million, Mr. Eaton had a partnership in Otis & Co., the Cleveland investment bank. He settled in Cleveland himself multiplying his interests, which came to include steel and rubber conthat year. From then until 1925 he busied 1913, becoming a naturalized citizen
